"What are your main reasons for using Python?" Availability of machine learning/deep learning toolkits -Availability of general-purpose data analysis toolkits -Development speed and efficiency -Availability of ROOT through PyROOT -Availability of particle physics analysis tools (other than ROOT) Ability to use Python as an interface to other software -Just because I like Python -Availability of collaboration-specific software in Python -Not a choice: requirement comes from other constraints -I don't use Python -Other reasons, not listed above -
